

Announcement: COMBIFLEX and COMBITEST brand appearance migration plans

Dear valued customer,

In October 2021 we became Hitachi Energy, starting our journey as part of the Hitachi Group. We are currently migrating our COMBIFLEX and COMBITEST deliveries according to our new company name. As part of the migration process, product packaging, product plates, product documentation, and collaterals will feature the Hitachi Energy logos. This cohesive approach will reinforce our brand identity and create a more impactful visual presence. Our individual COMBIFLEX and COMBITEST product branding appearance migration plans are as follows.

COMBIFLEX and COMBITEST

The logo on COMBIFLEX and COMBITEST products will change from ABB to Hitachi from July 1st, 2025. This applies to all active products manufactured in Europe and India from July 1st, 2025. Products in Limited phase maintained for spares will migrate to the new logo in a phased manner and we expect to complete the migration by December 31st, 2026. For active products there could be a mix of products with ABB logo and Hitachi logo for the first few months, depending on the stock and offtake.

Background information regarding previously communicated company naming change.

Hitachi ABB Power Grids is evolving to become Hitachi Energy and broadens commitment to a sustainable energy future

We thank you for your continued support. In case of any questions regarding the branding change, please contact your local Hitachi Energy representative.

Yours sincerely,
